

INDUSTRIAL STRUCTURES

PLATFORMS (MEZZANINES)

**Platforms with:
Engineering clarity
Cubic efficiency
Cost effectiveness**

Engineering Clarity

Comprehensive engineering documents for a less stressful permitting and construction process

Cubic Efficiency

Improve your facility's space allocation – build up, not out

Cost Effectiveness

Lower construction costs often by 3x, over new construction

This 3-level platform and bridge enabled faster throughput for a national retailer

Design puts *custom solutions* within your reach and cubic efficient platforms in your warehouse

Engineering Clarity

The hallmark of Western Pacific is *engineering clarity*. WPSS is able to troubleshoot and remove project obstacles because its engineers pay attention to the details. Our engineering specifications, drawings and instructions create a clear path through the permitting/approval and construction process, removing what is often a daunting experience.

Cubic Efficiency

Improved space allocation is the driving force behind every Western Pacific platform (mezzanine) project. In industries where 24-hour order turnarounds are the gold standard, optimizing through-put is a clear path to optimized product and profit margins. By building up and not out, you increase the cubic value and efficiency of your operations.

Cost Effectiveness

A traditional expansion project could cost nearly three times as much as a platform installation – and that's not including permits or land cost. Additionally, Western Pacific's LEAN manufacturing principles guide our work at every step, further driving down your construction costs and adding much needed square footage to your facility.

You will always be Storage-Smart when you use Western Pacific Storage Solutions

“All the work that you folks put into the design and re-designs of our U.S. Post Office platform (mezzanine) really paid off. The dimensions were perfect and everything fit together like a precision Swiss watch.”

Western Pacific Storage Solutions has a proven track record of over three decades in manufacturing that serves the material handling supply chain. Our customers include hundreds of respected brand-names, large integrators and other material handling experts.

Western’s LEAN manufacturing principles are built into every product and engineering project. Our highly respected engineering team delivers ninth-degree precision to provide trouble-free workspace and inventory solutions.

We help our customers attain a higher level of efficiency by improving space allocation, increasing the cubic value of overall usable space and diversifying their storage portfolio with RiveTier boltless, cost-effective Pacific, strongest one-piece Deluxe shelving, multi-level shelving structure, gravity flow QuikPik and Industrial Structures with engineering clarity.

Project Management

WPSS’ committed engineering staff are available throughout each step of evaluation, planning, specifying, permitting, construction and final inspection to provide comprehensive project management services. Their experience provides step-by-step peace of mind and a stress-free outcome.
