

Now it's easier to roll with the changes and challenges of order fulfillment

Western Pacific's Accu-Wall shelving with casters makes it easier to have light-directed technology anywhere.

Light-directed system NOT manufactured by WPSS

Western Pacific Accu-Wall shelving with casters and space-saving design make it easier to integrate put-to-light or pick-to-light technology wherever needed in ecommerce or fulfillment operations. Casters are offered on both pass-thru and closed-back units.

5-inch industrial swivel casters make it easier to move shelving between areas of the distribution center or warehouse.

Space-saving 24" shelf means increased flexibility to meet fulfillment demands.

Thousands of changing SKUs in a vast facility. Employee turnover. Increased holiday shipments. Merchandise returns. If you manage a warehouse or distribution or fulfillment center, a big part of your job is managing the logistics of continual change.

That's why Western Pacific Storage Solutions added the option of casters to our Accu-Wall shelving units. This mobility feature helps you respond quickly when fulfillment requirements change by making units easier to move where needed in the distribution center. And, the speed and accuracy of put-to-light or pick-to-light technology moves right along with it.

Accu-Wall shelving system integrates with any put-to-light or pick-to-light system you may obtain from manufacturers of light-directed technology. On average, pick rate productivity increases by up to 40% with Accu-Wall shelving over manual methods.

Accu-Wall shelving with casters also helps you keep your ecommerce entity organized and products easily accessible by quickly reconfiguring for constantly changing merchandise SKUs.

Western Pacific Accu-Wall shelving gives warehouses and fulfillment or distribution centers a cost-effective, scalable solution for meeting changing business needs and keeping pace with future growth strategies.

Talk to your Western Pacific Storage Solutions regional manager about your overall ecommerce plan. They can help expand business by helping you consider ways to maximize the capacity of existing square footage – from storage to conveying to packaging and back to shipping. And increase throughput efficiency by integrating Accu-Wall shelving.

You can increase throughput by up to 40% with Accu-Wall shelving.

**Accu-Wall shelving design is available in our most popular shelving configurations:
Deluxe Shelving Systems
RiveTier® Boltless Shelving Systems**

For more than 30 years, Western Pacific Storage Systems has been providing supply-chain storage systems for industry and retail. If you haven't worked with WPSS, you can see a long list of top-brand clients who have; read some comments and case studies under "About" at www.wpss.com.
