

Deluxe Industrial Shelving

- Built for heavy loads and industrial-cycle use
- Reconfigure the adjustable shelves as inventory changes
- Modular design supports expansion and layout flexibility
- Durable steel finish and construction for long-term reliability
- Open or closed shelving options available

Industrial Strength for Real-World Demands

The Deluxe Industrial Steel Shelving system provides the durability and versatility needed for the most active warehouse, manufacturing, and maintenance environments. Made from heavy-gauge steel, each component is designed to handle daily wear and tear, ensuring long-lasting performance even under constant use.

Flexible and Configurable

Operations change and your shelving should too. Deluxe shelving allows shelf levels to be adjusted in 1-1/2" increments to accommodate different product sizes and shapes. This modular flexibility makes it easy to adapt as your SKU mix evolves or as your storage priorities shift.

Optimize Space and Workflow

With its high-density design, Deluxe shelving helps you get more out of every square foot. By optimizing vertical space, you can store more inventory without expanding your footprint. Open shelf access and organized storage layouts also reduce retrieval time and improve workflow efficiency.

Engineered for Growth

From a small parts area to a large-scale distribution operation, Deluxe shelving grows with your needs. Add-on units easily connect to existing sections, allowing quick expansion or reconfiguration without disrupting operations.

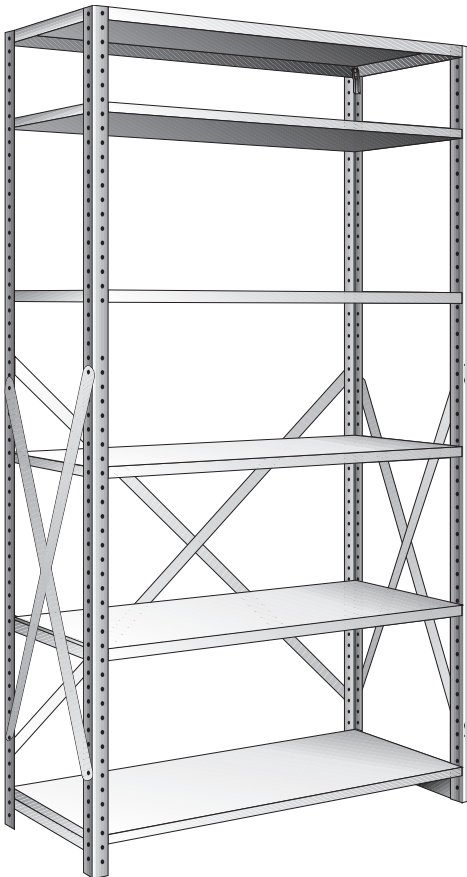

Durability that Pays Off

Investing in Deluxe Industrial Shelving means fewer replacements and lower maintenance over time. Its all-steel construction, corrosion-resistant finish, and precise engineering ensure your storage remains stable, safe, and reliable year after year.

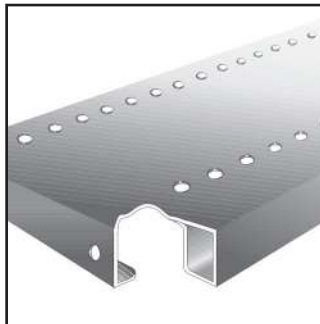

Deluxe Industrial Shelving

- Open or closed shelving options
- Heavy-duty or low-profile applications
- Widths 30" to 48"
- Depths 12" to 36"
- Heights up to 219"
- Box shelves available in a variety of gauges for medium to high capacity
- Expand shelving horizontally or vertically to maximize space

Posts

Deluxe posts utilize a compression clip that allows shelves to be adjusted on 1-1/2" centers. Use angle posts on the backs and angle, beaded, or high rise box posts on the front.

Box Shelf

Shelves available from medium 24-gauge to extra heavy-duty 18-gauge. Shelves are punched to accept dividers and / or label holders.

Open or Closed Units

Open units improve visibility and speeds up picking. Closed units keep product separated and can even have dividers to create dedicated bin space.

Built for Long-Term Efficiency!

Since business rarely stands still, the ability to reconfigure matters. Deluxe shelving supports the evolution of your operation rather than locking you into a static layout. You can easily add on to existing shelving as your storage needs change.

Let's plan a layout today that adapts to your tomorrow. We provide layout guidance, spec sheets, and recommended best-practice clearances for storage and picking access to ensure an efficient and space saving design.
